Huawei Technologies appointed Sunbury Height PM as project and cost managers for new 4500 sq.m. Class A office space finished under Shell&Core. From the first working day we've recognized their unique team spirit and professional approach to achieving the objectives set in timely and efficient manner.

Due diligence of the premises performed by Sunbury Heights PM helped us much in pushing the landlord to complete its remaining works and to mend the defects fixed. Detail cost analysis and control combined with an integrated approach to managing contractors allowed us not only getting the best Class A office space from quality-cost ratio, but also being confident that all is in hand during the whole project while putting all of the burdensome obligations on Sunbury Heights PM professionals.

Sunbury Heights PM managed to understand exactly what we needed and to carry out the plan into practice within the challenging schedule. Unlike majority of companies in Russia, even after project practical completion Sunbury Heights PM continued offering its professional and helpful support when we needed that.

The best assessment of the work done was further appointment of Sunbury Heights PM as project and cost managers for our new fit-out projects in Moscow.

Sunbury Heights PM professionals indeed exceeded our expectations in all respects and once again proved their unshakeable reputation in the city therefore we have absolutely no hesitation to recommend Sunbury Heights PM as Project, Cost or Moving managers.
